

Killer Shell CKAD Simulator Score

e171784d-d955-4427-a45d-0b5a0778657f

This score will be calculated every few minutes
2022-03-02 (4 minutes ago)

This simulator is more difficult than the real certification
We think this gives you a greater learning effect and also confidence to score in the real exam. Most of the scenarios require good amount of work and can be considered "hard". In the real exam you will also face these "hard" scenarios, just less often. There are probably also fewer questions in the real exam.

Solved subtasks:

36 / 112

Low Score

Scenario 1	1 of 1
File /opt/course/1/namespaces contains all namespaces	✓
Scenario 2	5 of 5
Pod is running	✓
Pod has single container	✓
Container has correct name	✓
Container has correct image	✓
File /opt/course/2/pod1-status-command.sh uses kubectl	✓
Scenario 3	0 of 6
Job created	✗
Job has succeeded three times	✗
Job has parallelism of two	✗
Job has single container	✗
Container has correct name	✗
Container has correct image	✗
Scenario 4	2 of 5
Deleted Helm release internal-issue-report-apiv1	✓
Upgraded Helm release internal-issue-report-apiv2	✗
